

MICRO 5-5 PLUS

COMPLEXED MICRONUTRIENTS

with Organic and Amino acids

GUARANTEED ANALYSIS:

Zinc (Zn)	5.00%
Manganese (Mn)	5.00%
Iron (Fe)	1.50%
Copper (Cu)	1.00%
Boron (B)	1.00%

PLANT NUTRIENT SOURCES:

Boric acid, copper sulfate, iron sulfate, iron organic acid, manganese organic acid, manganese sulfate, zinc organic acid and zinc sulfate.

MICRO 5-5 PLUS PRODUCT INFORMATION:

- An advanced generation of plant micronutrients complexed with organic and amino acids to enhance nutrients availability and uptake by the plants.
- **Super water-soluble** plant nutrients for efficient crop use without chloride salts that can be toxic to plants.
- Provides many essential nutrients in a balanced and readily available form.
- **MICRO 5-5 PLUS** is formulated for crops that require immediate source of micronutrients at early or late stage of growth. It is recommended as a seed/plant starter and root growth enhancer. The high level of zinc in **MICRO 5-5 PLUS** may enhance the synthesis of enzymes and plant growth substances
- Contains natural organic and amino acids.

Caution: Keep Out of Reach of Children

DIRECTIONS FOR USE:

MICRO 5-5 PLUS micronutrients are recommended for use on all plants. **MICRO 5-5 PLUS** is intended to supplement and enhance a full fertilization program as recommended in accordance with reliable Soil and Tissue Analysis. **MICRO 5-5 PLUS** provides a source of immediately available nutrients but will not, by itself, provide all necessary nutrients required during the growing season. **MICRO 5-5 PLUS** is designed for foliar application and for injection through chemigation and sprinkler systems.

Sprinkler Irrigation: Apply at the rate of 1-2 lbs/acre with irrigation water. Inject **FOLI-R PLUS™** half an hour before end of irrigation cycle.

Foliar Application: Dissolve the recommended amount of **MICRO 5-5 PLUS** in at least 25 gallons water per acre.

For Potatoes and Sugar Beets: Apply 1/2-1 pound/acre at 6-8 leaf stage or at tuber initiation.

For Grain Crops: Apply **MICRO 5-5 PLUS** at the rate of 1/2-1 pound per acre at flag leaf sheath opening or before early boot stage.

For alfalfa: Apply **MICRO 5-5 PLUS** at the rate of 1/2-1 pounds per acre 10-14 days after first cutting. Repeat after each cutting.

Compatibility: **MICRO 5-5 PLUS** is compatible with most fertilizers (including phosphates) and registered pesticides. However, compatibility jar test and small plot test is recommended before large-scale treatments are started. Always refer to products label. **TANK MIXING** Fill the tank with half the water, add **MICRO 5-5 PLUS** and agitate to dissolve. Add dry formulations and dissolve, follow by liquids. Bring to volume with water. After thorough mixing, allow this mixture to stand for 5 minutes. If the combination remains mixed or can be readily remixed, it is physically compatible. Once compatibility has been proven, use the same procedure for adding products to the spray tank. **CAUTION:** This fertilizer contains **boron** and should be used only as recommended. The use of this fertilizer on any crop(s) other than those recommended may result in serious injury to the crop(s).

IMPORTANT NOTICE TO PURCHASER: Seller's and manufacturer's only obligation to a purchaser or user of this product shall be to refund the purchase price, or to replace the quantity purchased, of any defective product. In no event shall Seller or manufacturer be liable to a purchaser or user of this product for any claim for any economic, indirect, special, incidental or consequential damages, or for any injury, loss or damage, direct or indirect, to any person or property. Purchaser of this bag of fertilizer material expressly acknowledges and agrees to these terms.
