

BULK R

GENERAL INFORMATION:

Bulk-R contains natural growth promoters, enzyme precursors, and nutrients that stimulates a plants' photosynthetic reactions causing the plant to 'bulk-up' the seeds or the fruit it produces, increasing test weight and yield.

Bulk-R

can be used with all plant types and should be foliar applied at a rate of 1 gallon per acre 30-40 days before harvest.

should NOT be applied with any other mineral based or plant nutrient product.

Aerial Application: Apply the recommended amount of *Bulk-R* in a minimum of 3 gallons water per acre.

Foliar Application: Apply the recommended amount of *Bulk-R* in at least 10 gallons water per acre.

Potatoes and Sugarbeets: Apply 1 gallon per acre 30 to 40 days prior to harvest.

Row Crops: Apply 1 gallon per acre at early filling stage.

Field and Vegetable Crops: Apply at the rate of 1 gallon per acre at post-bloom or early fruiting.

Compatibility: *Bulk-R* is compatible with most fungicides or insecticide. However, compatibility jar test recommended before mixing. Always refer to products label.
