

FOLIAR BIOLOGY BOOST

General Information:

Foliar Biology Boost inoculates the plant's leaf surface with beneficial microorganisms that provide the plant with a natural defense against disease, fix atmospheric nitrogen, and solubilize nutrients increasing availability.

Foliar Biology Boost

can be used on all plant and crop species and is designed to enhance a full fertilizer program.

Corn: Apply 1.6 ounces per acre at V3 - V6 stage. Repeat at V9 if necessary.

Soybeans: Apply 1.6 ounces per acre at V3 - V6. Repeat at R3 - R6 if necessary.

Small Grains: Apply 1.6 ounces per acre before flag leaf sheath opening or before early boot stage.

use with a minimum of 10-25 gallons of spray solution per acre.

should be applied with at least 1 pint or more of Bio-Release, to activate and enhance the biology
