

MOLYBDENUM 3%

GENERAL INFORMATION:

Molybdenum is an essential micronutrient. It is the mineral that drives plant and microbial reactions that fix nitrogen and convert it into amino acids and eventually proteins. It is designed to work with all plant species and in soils with molybdenum deficiency.

GUARANTEED ANALYSIS:

Molybdenum (Mo)3.0%

Derived from molybdic acid complexed with organic and amino base.

Molybdenum 3%

apply in small doses, no more than 4 ounces per acre at a time and no more than 6 ounces per year.

preferred application is at the same time as nitrogen, pre-plant, in-furrow, or side-dress at 2-4 ounces per acre.

can also be applied foliar.

Compatibility: *Molybdenum 3%* is compatible with most fertilizers and registered pesticides. However, compatibility jar test is always encouraged prior to mixing. Always refer to products label.

Warning: This fertilizer contains Molybdenum and is for use on soils that respond to Molybdenum. Crops high in Molybdenum are toxic to grazing animals (ruminants). Do not exceed the recommended rate.
