

SOLU-PLKS

ORGANIC NUTRIENTS STABILIZER

SOLU-PLKS TECHNOLOGY:

SOLU-PLKS is a low pH Humic/Fulvic acid soil conditioner based on fermented and extracted natural compounds and organic matter substrates and derivatives.

Contains non-plant food ingredients: Humic/Fulvic Acid derived from Leonardite.

BENEFITS OF SOLU-PLKS™

- **NATURAL AND ENVIRONMENTALLY SAFE**
- **100% BIO-DEGRADABLE**
- **NON-TOXIC**
- **WATER SOLUBLE**

Caution: Keep Out of Reach of Children

DIRECTIONS FOR USE:

SOLU-PLKS is recommended for use on all soils and plants. **SOLU-PLKS** may enhance nutrient availability and microbial activity. **SOLU-PLKS** is intended to supplement and enhance a full fertilization program as recommended in accordance with reliable Soil and Tissue Analysis. **SOLU-PLKS** provides a source of immediately available nutrients but will not, by itself, provide all necessary nutrients required during the growing season. **SOLU-PLKS** is designed for foliar, soil application, and for injection through chemigation and sprinkler systems.

Sprinkler Irrigation: Apply at the rate of 1-2 gallons/acre with irrigation water.

Soil Mark-out, In Furrow or Side Dress: **SOLU-PLKS** is essential to complex macro and micronutrients as applied early in the season.

Corn and Soybean: Apply **SOLU-PLKS** at the rate of 1/2-1gallon/acre.

Potatoes and Sugar Beets: Apply 1/2-2 gallon/acre.

Grain Crops: Apply **SOLU-PLKS** at the rate of 1/2-1gallon/acre.

Alfalfa and hay crops: Apply **SOLU-PLKS** at the rate of 1/2-2gallon/acre.

Foliar Application: Add Solu-PLKS at the rate of 1-2 pints per acre fill water and add the other ingredients as recommended by the manufacturers. Use with a minimum of 15 Gal water per acre.

Aerial Application: Use the recommended amount of **SOLU-PLKS** in at least 8 gallons water per acre.

Compatibility: **SOLU-PLKS** is compatible with most fertilizers (including phosphates) and registered pesticides. However, compatibility jar test and small plot test is recommended before large-scale treatments are started. Always refer to products label. **TANK MIXING** Fill the tank with half the water, add **SOLU-PLKS** and agitate to dissolve. Add dry formulations and dissolve, follow by liquids. Bring to volume with water. After thorough mixing, allow this mixture to stand for 5 minutes. If the combination remains mixed or can be readily remixed, it is physically compatible. Once compatibility has been proven, use the same procedure for adding products to the spray tank.

IMPORTANT NOTICE TO PURCHASER: Seller's and manufacturer's only obligation to a purchaser or user of this product shall be to refund the purchase price, or to replace the quantity purchased, of any defective product. In no event shall Seller or manufacturer be liable to a purchaser or user of this product for any claim for any economic, indirect, special, incidental or consequential damages, or for any injury, loss or damage, direct or indirect, to any person or property. Purchaser of this bag of fertilizer material expressly acknowledges and agrees to these terms.
